Jay,

Please route the
attached to the
appropriate office.

I don't believe
Public Affairs is the
appropriate action office.

Thanks,

STAT

you may have.

We look forward to your response.

Sincerely,

Robert T. ...

Gentlemen:

Apollo Systems Technology, Inc. (AST) is currently performing a Small Business Innovation Research (SBIR) contract (F04704-85-C-0148) for the Air Force Ballistic Missile Office (BMO) titled "Definition and Assessment of Physical Security Threats to Small ICBM Basing Systems." We have access to most of the published data on threats (terrorism, sabotage, espionage, etc.), physical security, and vulnerability/survivability from DTIC/NTIS and other data sources. However, we are also seeking raw, unpublished, and uncirculated data that your organization may have which would assist us in preparing a more comprehensive report for the Government.

If you have any uncirculated information on past assaults on U.S. ICBM sites, in-situ saboteurs, and the terrorist threat, we would like to have access to your data for this study. Should any of that information be classified, I might point out that we do possess a Facility Clearance at the SECRET level. We also have a GSA-approved storage capacity at the SECRET level. In addition, we have approved access to CNWDI and WNINTEL information.

Please inform us as to what we need to do to obtain this kind of information from you. Since this contract ends on 15 May 1986, time is of the essence. Consequently, we would be most grateful to you if you will expedite a response to this correspondence with instructions on what needs to be done by us to obtain any relevant information you may have.

We look forward to your response.

Sincerely yours,

Robert T. Uda
